Invoice and document templates

The layouts the system is delivered with. Every entity may issue on the delivered template as it stands, brand it, amend it, or replace it with its own — and may keep as many saved templates as it needs, one per country, per entity, per document type or per customer.

No template decides which taxes it shows. The taxes activated for the entity, the country and the supply decide, and the template renders whatever they produce — each tax on its own line, in the calculation, posted to its own account. The last page sets out those rules, which apply to every template here and to every template an entity builds.

Each page below carries the layout, the fields that are mandatory on it, and the rules the build must enforce. Codes in the left column are the template identifiers to load.

Code	Template	Applies to	Basis
SL-VAT-01	Tax invoice — statutory layout	Sri Lanka, VAT registered	Gazette 2481/22
SL-VAT-02	Tax invoice — branded	Sri Lanka, VAT registered	Gazette 2481/22, cl. 6
SL-VAT-03	Tax invoice — several taxes, foreign currency	Any country, any tax set	Specification 2.4.3
SL-NTX-01	Invoice — no tax charged	Sri Lanka, exempt or unregistered	Specification 2.4.2
SL-TCN-01	Tax credit note	Sri Lanka	VAT Act s.22
SL-TDN-01	Tax debit note	Sri Lanka	VAT Act s.22
INT-COM-01	Commercial invoice — export	Cross-border supply, any country	Trade practice
EU-VAT-01	VAT invoice — EU and UK	EU member states, United Kingdom	Directive 2006/112 art. 226
GCC-VAT-01	Tax invoice — bilingual	UAE, Saudi Arabia, GCC	GCC VAT Framework
IN-GST-01	Tax invoice — GST	India	CGST Rules r.46
US-ST-01	Invoice — sales and use tax	United States	State practice
PRF-01	Pro forma invoice	All countries	Not a tax document
RCT-01	Receipt	All countries	Specification 2.3.6
DLV-01	Delivery note	All countries	Specification 2.9.6
SOA-01	Statement of account	All countries	Specification 2.3.8
IND-TAX	Industry levies applied before the transaction tax	All countries, by sector	Specification 2.1.7, 2.4.3
TAX-REF	How taxes and currency present on any document	All countries, all documents	Specification 2.4.3

Country templates are delivered for the jurisdictions above. Where an entity operates in a country not listed, it creates its template in the designer or uploads its own, and the mandatory-field rules for that country are configured alongside it.

SL-VAT-01

Tax invoice — Sri Lanka, statutory layout

Gazette Extraordinary No. 2481/22 of 27 March 2026, Annexure I · mandatory from 1 July 2026 · rescinds the format under Gazette 2463/05

WHAT THE BUILD MUST ENFORCE ON THIS TEMPLATE

- Title printed exactly as `TAX INVOICE`, bold and boxed, in a conspicuous position, and the serial number as `YYMMM_QQQQ_XXXXX` — at most 40 characters, no spaces. Neither is configurable; the field map carries the full numbering rule.
- Supplier block top left, purchaser block top right. TIN is nine digits for both parties, validated on entry, and the invoice cannot be issued without both.
- Both dates print as `MM/DD/YYYY` — the order the gazette specifies, not the Sri Lankan convention, so it is fixed here and never taken from the locale. Amounts in LKR to two decimals, with the three prescribed rows in the gazette's order and wording.
- Any levy the entity's industry attracts prints **above** the value of supply, so that figure already includes it and the prescribed VAT row still reads as the gazette intends. Which levy, at what rate and on what base comes from the industry tax set on page IND-TAX, not the template.
- A tax invoice carries only supplies subject to VAT; a mixed order is split and SL-NTX-01 issued for the remainder (gazette cl. 4.2). Remittance details print in the footer under cl. 6.3, drawn from the entity bank account that matches the invoice currency.

SL-VAT-02

Tax invoice — Sri Lanka, branded

The same statutory content under the entity's own branding, exercising gazette clauses 6.1 to 6.4 — modifications, extra columns and rows, logo in header or footer

WHAT BRANDING MAY AND MAY NOT CHANGE

- May change: logo and trademark in header or footer, typeface, colour, block order, and added columns or rows such as HS code and discount — gazette cl. 6.2 and 6.3.
- May not change: the title wording, the presence of either TIN, the serial number format, the date format, the three prescribed total rows and their order, or the exclusion of non-taxable lines.
- Industry levies are not a template change. Setting the entity's industry under 2.1.7 activates that industry's tax set, and every levy in it appears above the value of supply at its own rate and base. A levy that does not apply prints no line.
- The designer validates a branded template against the mandatory field set before it can be saved as active. A template failing validation saves as a draft and cannot be issued against.
- Where the Commissioner General amends the format, the delivered template is reissued as a new version and derived templates are flagged for re-validation; issued invoices keep the version they were produced under.

SL-VAT-03

Tax invoice — several taxes and a foreign currency

The same statutory template carrying every tax activated for the supply, each on its own line, and the exchange rate block where the invoice is not in the entity functional currency

ENTITY LOGO

Sample Trading (Private) Limited
No. 42, Nawam Mawatha, Colombo 02 · TIN 123456789

Date of Supply : **07/16/2026**

Purchaser's TIN : **987654321**
Purchaser's Name : **Specimen Holdings PLC**
Address : **No. 7, Union Place, Colombo 02**

Description of Goods or Services	Qty	Unit Price (USD)	VAT	Levy	Amount Excl. Tax (USD)
Supply and installation of network switches	4	1,500.00	18%	2.5%	6,000.00
Structured cabling — Cat 6A, per point	60	42.00	18%	2.5%	2,520.00
Annual maintenance — 12 months	1	2,400.00	18%	—	2,400.00
Total Value of Supply					**10,920.00**
Turnover levy @ 2.5% on 8,520.00					213.00
VAT @ 18% on 11,133.00					2,003.94
Stamp duty — fixed					1.60
Total Amount/consideration including taxes (USD)					**13,138.54**

Invoice currency : **USD**
Exchange rate : **1 USD = 302.4500 LKR**
Rate source / date : **Entity preferred source, 07/16/2026**

Total in LKR : **3,973,751.42**
VAT in LKR : **606,091.65**
Turnover levy in LKR : **64,421.85**

Memorandum — withholding at source. Where the customer is required to withhold, the rate, the amount and the net expected are printed beneath the total as a memorandum. The withholding is not a charge by the supplier and never forms part of the invoice total.

PAYMENT BY BANK TRANSFER — ACCOUNT IN THE INVOICE CURRENCY

Bank **Specimen Bank PLC — Foreign Currency Unit**
USD account **002-9-887-1234 · SWIFT SPCBLKLX**
Account name **Sample Trading (Private) Limited**
Payment reference **Quote 26JUL_BR03_00418**

HOW TAXES AND CURRENCY BEHAVE ON ANY TEMPLATE

- Every tax type activated for the supply prints as its own line, in the configured order, with its own label, its own rate and its own base. Activating a tax adds the line and includes it in the calculation; no template is redesigned and no code is changed.
- Each tax states the base it was charged on, because the bases differ: a levy may be charged on the value of supply while VAT is charged on the value plus that levy. The order of application is configuration, not something a user applies by hand.
- A tax that does not apply to a line shows a dash and is excluded from its base, so one invoice may carry three taxes on one line and one on the next. A fixed-amount tax, such as a stamp duty, prints on the same footing as a percentage one.
- Where the invoice currency is not the entity functional currency, the rate, its source and its date print, together with the total and each tax amount in the functional currency, because tax is declared and paid in that currency. The block is suppressed when the two currencies match.
- Taxes withheld by the customer are a memorandum beneath the total, never a line in it, and the bank account printed is the one held in the invoice currency.
- Each tax line carries the account it posts to, so the printed line and the ledger entry come from one configuration, and the permitted tax set is configured per country.

SL-NTX-01

Invoice — no tax charged

For exempt, zero-rated or out-of-scope supplies, and for suppliers not registered for VAT · specification 2.4.2

ENTITY LOGO

Sample Trading (Private) Limited
No. 42, Nawam Mawatha, Colombo 02, Sri Lanka
Company No. PV 00123456 · Tel +94 11 234 5678

INVOICE

This is not a tax invoice. No VAT has been charged on this supply.

Invoice No. : **SI-2026-07-001188**
Date of Invoice : **15/07/2026**
Date of Supply : **12/07/2026**

Customer : **Specimen Holdings PLC**
Address : **No. 7, Union Place, Colombo 02**
Customer Ref : **PO-2026-0901**

Ref	Description of Goods or Services	Qty	Unit Price	Amount (Rs.)
EXM-0104	Educational services — certificate programme	12	18,500.00	222,000.00
EXM-0105	Course material — printed	12	2,400.00	28,800.00
Total Amount Payable:				**250,800.00**

Reason no tax is charged: Exempt supply under the First Schedule to the Value Added Tax Act, No. 14 of 2002. The reason is selected from the entity tax register and prints on the face of the document.

Total in words: **Two hundred fifty thousand eight hundred rupees only**
Payment terms: **30 days**

Mode of Payment: **Cheque**

Account name **Sample Trading (Private) Limited**
Payment reference **Quote SI-2026-07-001188**

WHAT SEPARATES THIS FROM A TAX INVOICE

- The title is `INVOICE`, never `TAX INVOICE`, and the document carries an explicit statement that no VAT has been charged.
- It runs on its own number sequence, separate from the statutory tax invoice series, so the tax invoice series stays gapless and auditable on its own (specification 2.1.10).
- No VAT column, no VAT total row, and no VAT rate anywhere on the face of the document.
- The reason tax is not charged is mandatory and is selected from the entity tax register — exempt, zero-rated, outside scope, or supplier not registered — not typed free-hand.
- Where a single order mixes taxable and non-taxable lines, the system issues a tax invoice for the taxable lines and this document for the rest, cross-referencing each to the other.
- Dates print in the entity locale here, because no gazette fixes the format for a non-tax document.

SL-TCN-01

Tax credit note — Sri Lanka

Reduces the consideration and the tax on a tax invoice already issued · VAT Act s.22 · a non-tax credit note, carrying no tax line, is delivered alongside it for supplies that bore no tax

BUILD RULES

- Two variants of this document exist and the system chooses between them from the original: a **tax** note where the document being adjusted carried tax, and a **non-tax** note, carrying no tax line at all, where it did not. The same split applies in every country.
- Each variant draws on its own gapless sequence, so tax notes and non-tax notes are never numbered from the same series (specification 2.1.10).
- Every tax the original document charged is reversed or raised on its own line, at the rate and on the base that applied then — not at today's rate. Where the original carried three taxes, so does the note.
- A partial adjustment carries the taxes proportionately, each recalculated on its own base rather than apportioned from a single total.
- The tax credit note reverses every tax the original document charged, each on its own line, in the period the note is issued rather than the period of the original invoice.
- Carries the number **and** the date of the document it adjusts. It cannot be issued without a valid reference to an issued document.
- Where the original was in a foreign currency, the note is issued in that currency and the exchange rate block prints as it did on the original, so the tax reversed in the functional currency agrees with the tax originally charged.
- The reason is selected from a configurable list and is mandatory. Free text may be added but may not replace the coded reason.
- Where the adjustment exceeds a configurable threshold or the original invoice is in a closed period, approval is required before issue (specification 2.3.9).

SL-TDN-01

Charges **OUR — remitter bears all bank charges**

We certify that this invoice shows the actual price of the goods described, that no other invoice has been issued, and that all particulars are true and correct.

Authorised signatory

BUILD RULES

- Zero-rated, not exempt: the supply carries a tax code that preserves the supplier's input tax recovery, and the invoice shows no tax line.
- Issued in the transaction currency with the rate to the entity's functional currency recorded on the posting, not printed on the document (specification 2.2.9).
- HS code, country of origin, net and gross weight, package count and marks are mandatory for a goods export and are drawn from the item master, not typed.
- Incoterms, ports and the freight and insurance split drive the revenue cut-off and the landed cost treatment at the buyer end; they are stored fields, not free text in a footer.
- Proof of export must be attached to the invoice before the zero rating is accepted at period close (specification 2.7.4 and 2.11.3).
- The certification wording is configurable per entity and per destination country.

EU-VAT-01

VAT invoice — European Union and United Kingdom

Article 226 of Council Directive 2006/112/EC · the United Kingdom applies substantially the same content requirements

ENTITY LOGO

Sample Europe B.V.

Total VAT					**7,576.80**
Total payable (EUR)					**44,296.80**

Where the reverse charge applies, the VAT columns print as 0.00 and this line prints instead: “Reverse charge — VAT to be accounted for by the recipient under Article 196 of Council Directive 2006/112/EC.”

Payment terms : **30 days net**
Due date : **14 August 2026**

PAYMENT BY BANK TRANSFER

Account name **Sample Europe B.V.**
IBAN **NL91 ABNA 0417 1643 00**
Payment reference **Quote NL-2026-004417**
Bank **Specimen Bank N.V., Amsterdam**
BIC / SWIFT **ABNANL2A**
SEPA mandate **NL-DD-00412, collected 14 Aug 2026**

BUILD RULES

- Both VAT numbers are mandatory for a cross-border business supply, and the customer number is validated against VIES at the point of issue, with the validation response stored as evidence.
- A separate net and VAT subtotal is printed for **each** rate applied — article 226 requires the breakdown, not just a single VAT total.
- Sequential numbering that uniquely identifies the invoice is a directive requirement, so the series is gapless and a cancellation leaves a cancelled document, not a missing number. Where a SEPA mandate is held, the mandate reference and collection date print with the bank block.
- Reverse charge, margin scheme, intra-community supply and exemption each have prescribed wording. The wording is held per tax code per country and prints automatically; it is not typed by the user.
- Where the entity is registered in more than one member state, the VAT number and the bank account printed are those for the state of supply, not the entity default.
- Country variations — Italy's SdI, Poland's KSeF, France's e-invoicing mandate — are handled as e-invoicing transmissions against this same template, not as separate layouts.

GCC-VAT-01

Tax invoice — Gulf Cooperation Council, bilingual

GCC VAT Framework Agreement as enacted in the UAE and Saudi Arabia · Arabic is a content requirement in Saudi Arabia and the layout supports it throughout the Gulf

TRN 100123456700003

TAX INVOICE · فاتورة ضريبية

Tax Invoice No. : **AE-2026-07-00891**
Date of issue : **15/07/2026**
Date of supply : **12/07/2026**

Recipient : **Namuna General Trading LLC**
Address : **Warehouse 14, Al Quoz, Dubai, UAE**
Recipient TRN : **100987654300003**

Description الوصف	Qty	Unit price (AED)	Taxable amount	VAT %	VAT (AED)	Total (AED)
Supply of office furniture — workstations	24	1,850.00	44,400.00	5	2,220.00	46,620.00
Delivery and installation	1	3,600.00	3,600.00	5	180.00	3,780.00
Total taxable amount			**48,000.00**	**5**	**2,400.00**	**50,400.00**
Total VAT in AED إجمالي الضريبة بالدرهم						**2,400.00**
Total amount payable المبلغ الإجمالي المستحق						**50,400.00**

Amount in words: Fifty thousand four hundred UAE dirhams only.
Where the supply is in a currency other than AED, the VAT amount is also shown in AED at the Central Bank rate on the date of supply, and that rate prints beneath the total.

SWIFT / BIC **SPCBAEAD**
Currency **AED — account held in the invoice currency**

BUILD RULES

- Both tax registration numbers print, and the recipient TRN is mandatory where the recipient is registered. The layout carries Arabic alongside English throughout; in Saudi Arabia the Arabic is mandatory, so the language pair is a per-country setting, not a user preference.
- The VAT amount must be expressed in the local currency even where the supply is invoiced in another, converted at the central bank rate for the date of supply. That rate prints on the document and is stored with the transaction.
- Saudi Arabia requires a QR code carrying seller name, VAT number, timestamp, total and VAT amount, and requires clearance or reporting through ZATCA before or shortly after issue. The QR block is driven by the e-invoicing configuration for the country.
- Simplified tax invoices below the configured threshold use a shorter field set; the system selects between the full and simplified template on the invoice value and the recipient type.
- Rounding is applied per line or per invoice according to the country rule, and the rule is held in the tax configuration rather than in the template.

IN-GST-01

Tax invoice — India, GST

Rule 46 of the Central Goods and Services Tax Rules · with e-invoicing where the entity is above the notified turnover threshold

ENTITY LOGO

Sample India Private Limited
Unit 402, Prestige Tech Park, Bengaluru 560103, Karnataka
GSTIN 29AABCS1429B1ZQ · CIN U72200KA2019PTC123456

TAX INVOICE

Invoice No. : **SIPL/2026-27/00417**
Invoice date : **15/07/2026**
Place of supply : **Karnataka (29)**
Reverse charge : **No**

Billed to : **Udaharan Enterprises Private Limited**
Address : **14 MG Road, Bengaluru 560001, Karnataka**
GSTIN : **29AADCU7890F1Z5**
State / code : **Karnataka / 29**

Description	HSN / SAC	Qty	Taxable value	CGST 9%	SGST 9%	Total (INR)
Software development services	998314	1	1,200,000.00	108,000.00	108,000.00	1,416,000.00
Annual support and maintenance	998313	1	300,000.00	27,000.00	27,000.00	354,000.00
Total			**1,500,000.00**	**135,000.00**	**135,000.00**	**1,770,000.00**

Where the place of supply is another state, CGST and SGST are replaced by a single IGST column at the combined rate. The system selects between them from the supplier state and the place of supply, never from a user choice.

Amount in words: Seventeen lakh seventy thousand rupees only.

Payment reference **Quote SIPL/2026-27/00417**

BUILD RULES

- The invoice number is unique for the financial year, at most 16 characters, and uses only letters, digits, hyphen and slash. The financial year runs April to March, so the series resets in April, not January.
- HSN or SAC is mandatory per line, at the digit length prescribed for the entity's turnover band.
- Place of supply with its state code drives the CGST/SGST against IGST decision. The system derives it from the supply rules; a user cannot override it on the invoice.
- Where e-invoicing applies, the invoice is registered with the Invoice Registration Portal before issue and the returned IRN, acknowledgement number and signed QR code print on the document. An invoice without a successful IRN cannot be delivered to the customer.
- Separate series are required for tax invoices, bills of supply, credit notes, debit notes and delivery challans; each is configured under 2.1.10.
- Bill-to and ship-to addresses are separate fields and both print where they differ.

US-ST-01

Invoice — United States, sales and use tax

There is no federal invoice format. Content follows state practice, and the tax stack is built per jurisdiction from the ship-to address

ENTITY LOGO

Sample North America, Inc.
1180 Market Street, Suite 700, San Francisco, CA 94102
Federal EIN 87-1234567 · CA Seller's Permit 123-456789

INVOICE

Invoice No. : **US-2026-07-11840**
Invoice date : **07/15/2026**
Terms : **Net 30 — due 08/14/2026**

Bill to : **Example Industries LLC**
Ship to : **2200 Harrison St, San Francisco, CA 94110**
Customer PO : **PO-2026-7741**

Description	Qty	Unit price	Taxable	Amount (USD)
Workstation hardware — model WS-400	12	1,450.00	Yes	17,400.00
Extended warranty — 36 months	12	180.00	No	2,160.00
Subtotal				**19,560.00**
Taxable subtotal				**17,400.00**
California state tax @ 6.000%				1,044.00
San Francisco County tax @ 1.250%				217.50
District tax @ 1.375%				239.25
Total sales tax				**1,500.75**
Total due (USD)				**21,060.75**

Ship-to address determines the tax. Where the ship-to jurisdiction differs from bill-to, the rate stack is built from the ship-to address down to district level. Where a valid exemption certificate is on file, the tax lines print as 0.00 and the certificate number prints beneath them.

REMIT TO — ACH, WIRE OR CHECK

Account name **Sample North America, Inc.**
Account number **000123456789**
SWIFT (international) **SPCBUS6S**
Bank **Specimen Bank N.A., San Francisco, CA**
ABA / routing **121000358 — wire · 121000248 — ACH**
Payment reference **Quote US-2026-07-11840**

BUILD RULES

- No VAT presentation. Tax is a stack of state, county, city and special district rates, each printed on its own line at the rate applied.
- Taxability is per line, not per invoice: the same order routinely carries taxable goods and non-taxable services, and the taxable subtotal is shown separately.
- The rate stack is determined by the ship-to address, and the address is validated to the level the jurisdiction requires before the invoice can be issued.
- Exemption and resale certificates are held against the customer with an expiry date. An expired certificate causes tax to be charged, and the system warns before the certificate lapses.
- Economic nexus by state governs whether tax is charged at all; the nexus setting is held per state per entity and drives the tax decision (specification 2.7.3).
- Numbering has no statutory format, so the entity sequence under 2.1.10 applies.

PRF-01

Pro forma invoice

Issued before supply so a customer can raise a purchase order, open a letter of credit or arrange payment · not a tax document in any jurisdiction

ENTITY LOGO

Sample Trading (Private) Limited
No. 42, Nawam Mawatha, Colombo 02 · TIN 123456789

PRO FORMA INVOICE

THIS IS NOT A TAX INVOICE · NO VAT IS RECOVERABLE ON THIS DOCUMENT

Pro forma No. : **PF-2026-0291**
Date : **02/07/2026**
Valid until : **31/07/2026**

Customer : **Specimen Holdings PLC**
Address : **No. 7, Union Place, Colombo 02**
Enquiry ref : **RFQ-2026-118**

Description of goods or services	Qty	Unit price	Amount excl. VAT (Rs.)
Supply and installation of network switches	4	112,500.00	450,000.00
Structured cabling — Cat 6A, per point	60	3,200.00	192,000.00
Estimated value of supply			**642,000.00**
Estimated VAT @ 18%			**115,560.00**
Estimated total			**757,560.00**

A tax invoice will be issued on supply. Amounts above are an estimate and are valid until the date shown. This document raises no entry in the ledger and consumes no number from the statutory tax invoice series.

ADVANCE PAYMENT OR LETTER OF CREDIT — BANK DETAILS

Bank **Specimen Bank PLC — Colombo 02 branch**
Account number **001-2-345-6789 · SWIFT SPCBLKLX**
Account name **Sample Trading (Private) Limited**
Payment reference **Quote PF-2026-0291**

BUILD RULES

- Posts nothing. No receivable, no revenue, no tax. The document exists in the sales cycle only.
- Runs on its own sequence and never draws a number from the tax invoice series, in any country.
- The "not a tax invoice" statement is mandatory and cannot be removed in the designer.
- Carries a validity date, after which it cannot be converted without being re-priced.
- Converts to a tax invoice or a non-tax invoice on supply, carrying its lines forward and keeping the link in both directions for audit.
- Tax shown is explicitly an estimate, at the rate in force on the pro forma date; the rate applied on the eventual invoice is the rate at the date of supply.

RCT-01

Receipt

Issued on receipt of payment and showing what the payment settled · specification 2.3.6

ENTITY LOGO

Mode of payment : **Bank transfer**
Bank reference : **FT26210998112**
Bank account credited : **Specimen Bank PLC — 001-2-345-6789**

Withholding tax deducted : **Nil**
Bank charges borne by : **Payer**
Receipt posted to : **GL 122010 — Trade receivables control**

Received with thanks the sum of eight hundred ninety-four thousand four hundred forty rupees only, subject to realisation where paid by instrument.

For Sample Trading (Private) Limited

BUILD RULES

- The receipt prints what the payment was applied to, document by document, including credit notes netted off. An unapplied balance prints explicitly rather than being hidden.
- Where tax is withheld at source, the gross, the withholding and the net all print, and the withholding certificate reference is captured for the tax credit claim (specification 2.7.6).
- A receipt issued against an instrument carries the subject-to-realisation wording and is reversed automatically if the instrument is returned unpaid.
- The receipt number comes from its own gapless sequence; cancellation leaves a cancelled receipt, never a missing number.
- Where the receipt currency differs from the invoice currency, the rate and the exchange difference posted both print beneath the totals.

DLV-01

Delivery note

Accompanies goods on despatch and is signed on receipt · specification 2.9.6

ENTITY LOGO

Sample Trading (Private) Limited

No. 42, Nawam Mawatha, Colombo 02 · TIN 123456789

DELIVERY NOTE

Values are suppressed on this template. An invoice follows.

Delivery note No. : **DN-2026-07-00914**
Despatch date : **12/07/2026**

Despatched from : **Colombo central warehouse**
Total packages : **9**

Gross weight : **184 kg**
Handling : **Fragile — keep dry**

Delivered by — name, signature, date

Received in good order — name, signature, date

BUILD RULES

- Values are suppressed by default. A priced variant of the same template exists for customers who require it, and the choice is a per-customer setting.
- Prints ordered, delivered and back-order quantities, so a partial delivery is visible on the document the customer signs.
- Batch and serial numbers print where the item is tracked, and are the numbers actually issued from stock, not a reprint of the order.
- Despatch posts the stock movement; the invoice posts the revenue. The two are separate events and the delivery note links them.
- The signed copy is attached back to the delivery as evidence and is required before the related invoice can be released where that control is switched on (specification 2.11.3).

SOA-01

Statement of account

Sent to the customer at period end showing every movement and the ageing of what is outstanding · specification 2.3.8

REMITTANCE — THE ACCOUNT FOR THIS STATEMENT CURRENCY

Bank **Specimen Bank PLC — Colombo 02 branch**
LKR account **001-2-345-6789 · SWIFT SPCBLKLX**
Account name **Sample Trading (Private) Limited**
Payment reference **Quote each invoice number settled**

BUILD RULES

- Two presentations are delivered: open item, listing only documents still outstanding, and full activity as shown here. The choice is a per-customer setting.
- Ageing buckets are configurable per entity and age from either the invoice date or the due date, the basis being stated on the document.
- A statement in a foreign currency shows that currency only; a customer trading in more than one currency receives one statement per currency, never a mixed total.
- Produced for a date, and reproducible for that date afterwards with the same figures, which is what makes it usable as audit confirmation evidence.
- Issued in bulk on a schedule by email against the customer contact, with every send recorded (specification 2.3.12).

IND-TAX

Industry levies applied before the transaction tax

How the industry an entity operates in changes what its invoice shows, without a template being edited · specification 2.1.7 and 2.4.3

Most sector levies are charged on turnover **before** the transaction tax, so that tax is computed on the value plus the levy. Setting the entity's industry under 2.1.7 activates its tax set, and every levy in it appears above the value of supply at its own rate and base. No template is edited.

Sri Lanka — the shape of an industry tax set

Industry	Sector levy in the set	Where it sits
Every liable sector	Social Security Contribution Levy, on liable turnover	Before VAT — VAT is charged on value plus levy
Telecommunications	Telecommunication Levy, on the value of telecommunication services	Before VAT, on its own base of telecom services only
Tourism and hospitality	Tourism Development Levy on turnover; service charge, which is a distribution and not a tax	Levy before VAT; service charge shown separately and excluded from the levy base where it is not turnover
Banking and financial services	VAT on financial services, charged on a value-addition base rather than per invoice; stamp duty on instruments	Not an invoice line — computed periodically and reported from the ledger, not from the sales document
Apparel and export manufacture	Cess and export levies on notified goods; the supply itself is usually zero-rated	Before the transaction tax, on the export value, with the supply at zero rate
Manufacture of excisable goods	Excise duty, by rate or per unit of volume, weight or alcohol content	Inside the value of supply, so VAT is charged on the duty-inclusive value
Import and distribution	Customs duty, ports and airports levy, cess, and the levy on import value	Into landed cost under 2.9.4 — these build the cost base and are not sales invoice lines
Construction and contracting	Stamp duty on contracts; retention withheld by the customer	Stamp duty as its own line; retention as a memorandum, outside the amount charged

Illustrative of the shapes the configuration must carry. Which levies an entity is actually liable for, at what rate and on what base, is set in its own tax register and confirmed with its advisers — not assumed by the software.

The same mechanism, other countries

Country	Sector levy charged before or alongside the transaction tax
India	Compensation cess on notified goods, charged with GST; state excise on alcohol
UAE and Saudi Arabia	Excise tax on tobacco, energy and sweetened drinks, forming part of the base on which VAT is charged
United Kingdom	Insurance premium tax, air passenger duty, soft drinks levy, plastic packaging tax
European Union	Environmental, packaging and recycling levies, and insurance premium tax at member-state rates
United States	Federal excise, telecommunications surcharges, hotel occupancy tax and per-unit fees, each on its own base beneath the sales tax stack

HOW AN INDUSTRY TAX SET BEHAVES

- A tax set is delivered per industry per country. Selecting the industry at entity set-up activates it; the levies then appear on every document they cover, in the calculation, in the ledger against their own accounts and in the returns that report them.
- An entity operating in more than one industry carries more than one set. The levy that applies is resolved per line from the item or service class, not from the entity, so one invoice can carry a telecommunications levy on one line and none on the next.
- Each levy states its own base. A levy may be charged on the net value while the transaction tax is charged on the net value plus that levy, and a second levy may be charged on neither. The order of application is configuration and the printed line names the base it used.
- A levy may be rate-based, per unit, banded, capped or a fixed amount, and may be charged on turnover, on a narrower class of supplies, or on a value that includes another levy.
- A sector levy introduced, changed or withdrawn by an authority is a dated configuration change. Documents issued before the effective date keep what they were issued with, and a credit note against one of them reverses at the levy and rate that applied then.
- Where a levy is not charged per invoice but computed periodically on a different base — the financial services case above — it is configured as a periodic tax computed from the ledger, and nothing appears on the sales document.
- Where an authority restricts what may appear on its prescribed document, the designer refuses a levy line it does not allow and the levy is carried inside the value of supply instead.

TAX-REF

How taxes and currency present on any document

The rules that apply to every template in this library, delivered or built by an entity · specification 2.4.3

A template does not decide which taxes it shows. The taxes activated for the entity, the country and the supply decide. Activating one adds its line, includes it in the calculation and posts it to its account — no template rebuilt, no code changed.

Tax mechanics the engine carries

Mechanic	How it presents and calculates
Percentage on value	Rate applied to the taxable base of the lines it covers, printed as its own line stating the rate and the base
Fixed amount	A stated amount per document or per line, printed on the same footing as a percentage tax
Compound	Charged on the value plus one or more taxes already applied. The order of application is configuration; the printed line names the base it used
Banded or tiered	Different rates by value band, quantity band or item class, resolved per line
Capped or floored	Subject to a maximum or minimum per line, per document or per period
Per unit	An amount per unit of quantity, volume or weight — excise and environmental levies
Reverse charge	Tax lines print at zero with the prescribed wording, and the liability is recorded against the recipient
Zero-rated and exempt	A dash on the line and no tax amount, with the reason carried from the tax register onto the document
Withheld at source	A memorandum beneath the total showing rate, amount and net expected. Never part of the invoice total
Rounding	Per line or per document, to the precision the country prescribes, with the difference posted to its configured account

Every document has a tax and a non-tax form

Document	Tax form	Non-tax form
Invoice	Tax invoice — tax lines, both registration numbers	Invoice — no tax line, coded reason none is charged
Credit note	Tax credit note — reverses every tax charged	Credit note — value only
Debit note	Tax debit note — raises every tax charged	Debit note — value only
Pro forma invoice	Taxes shown as an estimate at today's rates	No tax shown
Receipt	Withholding deducted shown gross, withheld and net	Amount received only
Self-billed and recipient-created invoice	Tax lines as the supplier would have charged	Value only

The system picks the form from the document being adjusted or the supply being billed, never from a user choice, and each form draws on its own gapless number series.

CURRENCY, EXCHANGE RATE, AND A TAX THAT DID NOT EXIST YESTERDAY

- Where the document currency differs from the entity functional currency, the exchange rate, its source and its date print on the document, together with the total and **each tax amount** in the functional currency, because tax is declared and paid in that currency. The block is suppressed entirely when the two match.
- Where a country requires the rate from a named source, that source is configured per country and the rate is taken from it rather than from the entity default (specification 2.2.9). A third currency may be shown alongside without affecting the posting.
- A new tax introduced by an authority is set up as configuration: name, mechanic, rate, base, order of application, the supplies it covers, its account, its effective date and the documents it prints on. From that date it appears on every document it covers and in every return that reports it, with no template rebuilt and no release required.
- A rate change is a dated change to the same tax, so documents issued before it keep the rate they were issued at, and a credit note against one of them reverses at the old rate.
- Where an authority restricts what may appear on a statutory document, the permitted tax set is configured per country per template, and the designer refuses a line it does not allow.
- Every tax line states the account it posts to, so the printed document and the ledger entry come from one configuration and cannot drift apart.
